

NOTICE TO CUTLER RECREATIONISTS:

A federally-required **drawdown** of the Cutler Reservoir will occur beginning on **MONDAY, OCT 20th 2014** that may extend into January of 2015. We expect reservoir elevations to return to normal no later than **mid-January 2015**, although project conditions encountered may alter the current schedule.

This reservoir drawdown is necessary to complete required maintenance work at Cutler Dam. The extent of impact of the drawdown to reservoir elevations, boating, and reservoir access points is known to likely affect all boat ramps and all areas of the reservoir.

It is likely that access to all of the Cutler boat ramps will be affected and potentially eliminated during the drawdown.

Please be observant as new **HAZARDS** may become exposed, and **areas that are usually accessible may become inaccessible**, potentially over a period of hours, particularly during the initial period of the drawdown event (expected to last at least through Oct 25th, 2014). **Please also note that removing any artifacts that may be exposed by the drawdown is illegal and will be prosecuted.**

Please call (801)220-2245 with any questions during the drawdown. We apologize for any inconvenience this may cause to reservoir access during the required maintenance.

Thank you—PacifiCorp Energy Hydro Resources
